### The Fuel Theft Problem

In this era of technology, thieves have harnessed the power of technology to steal millions of gallons of gasoline and diesel fuel every year. By tampering with the fuel dispenser and/or accessing the programming of the unit, they steal thousands upon thousands of diesel fuel per day!

### The Fuel Theft Solution

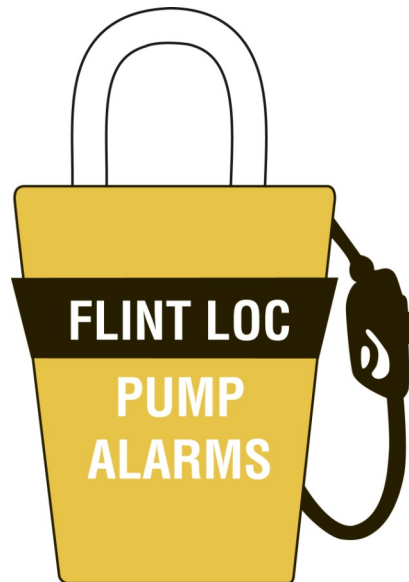

Fortunately, now there is something you can do about it. The Flint Loc Pump Alarm stops thieves BEFORE they can access the programming. It's really quite simple. Any tampering with the pump causes the pump to go into Sleep Mode. No gasoline or diesel fuel is dispensed while the pump is in Sleep Mode. In addition, tampering with the pump will set off a 105 decibel siren, a solid LED status light, and, in most cases, activates an offline alarm on the POS system. Not only does the Flint Loc Pump Alarm keep the diesel fuel and gasoline from being stolen, it helps to catch the crooks in the act!
